PROJECT EXPERIENCE

Songwall, Full-Stack Developer & Creator

January 2025 - Current

- Developed Songwall, a full-stack web application integrating the Spotify Web API, allowing users to create accounts, log in, rate songs, post reviews, post, and engage with other users through a music-focused social platform.
- Designed and implemented a relational database using SQLAlchemy and Flask, managing user profiles, song ratings, posts, and follow relationships to enable seamless social interactions.
- Built a secure authentication system ensuring user data protection, deployed at: www.songwall.org providing a scalable and accessible platform for music enthusiasts.

Fitness Friend, Full-Stack Developer & Creator

October 2024 - January 2025

- Developed a comprehensive fitness tracker with a custom-built API, integrating a front-end and back-end to ensure a seamless user experience.
- Utilized SQLAlchemy and Flask to manage a relational database containing user profiles, workout plans, lifts, and performance data, ensuring smooth data retrieval.
- Developed custom-built RESTful API using Flask to manage back-end functionality, and integrated a decision tree model trained on synthetic data for generating personalized user workout plans.

FlixPicks, Front-End Developer & Team Lead, Norfolk, Virginia

May 2023 - April 2024

- Led team in developing FlixPicks, an application consolidating streaming service content to simplify user discovery.
- Developed and integrated front-end features using TMDB API and a custom API gateway to display trending movies and personalized recommendations.

Personal Website, *Full-Stack Developer & Creator*

August 2024 - Current

- Developed a personal portfolio webpage featuring portfolio information, projects, and other features.
